PROFESSIONAL SUMMARY

Product Enablement Specialist III and Tech Services AI Gem Leader with a foundational degree in Data Analytics and AI. Over the past three years at ModMed, I have progressed from executing foundational client implementations to orchestrating complex cross-functional workflows and monitoring RPA infrastructure, currently focused on building LLM workflows, writing Python scripts, and leveraging data analytics to solve operational bottlenecks. Eager to bring my platform expertise, data analysis skills, and passion for AI product development to the Product Owner role to drive efficiency across the RCM lifecycle.

TOOLS & PLATFORMS

- **AI Product Development:** LLMs (Gemini, Claude Opus), Prompt Engineering, Agentic Workflows, Custom Gems.
- **Data & Engineering:** JQL (Jira Query Language), Google Apps Script, Python, Salesforce Reporting, Basic SQL.
- **Product & Agile:** Jira Bug Triaging, Confluence, Cross-Functional Orchestration, UAT, Agile Methodologies.
- **Domain Knowledge:** ModMed Practice Management (PM) Configuration, ModMed Scribe, SynapSYS API.

PROFESSIONAL EXPERIENCE

Modernizing Medicine, Inc. | Boca Raton, FL (Remote)

Product Enablement Specialist III & Tech Services AI Gem Leader | Feb 2026 – Present

- Promoted to Level III to drive AI adoption within the department as a designated Gem Leader.
- Developed the *Fax Flow Assistant*, an LLM tool automating the compliance review of LOAs; designed structured logic for full vertical document scans and mathematically determined port types.
- Partnered with peers to beta test and refine prompts before team release, acting as a change agent for intelligent automation.
- Independently learned Python to build *Ask PE*, a native desktop application with an integrated AI knowledge base that helps teammates instantly navigate SOPs via accessible links.
- Analyzed fulfillment data using JQL and Salesforce reporting to identify routing bottlenecks, successfully proving License Swap misrouting, and presenting findings at the CS Town Hall to improve workflows.
- Supported the enterprise rollout of ModMed Scribe by collaborating with engineering to monitor daily RPA deployment logs and resolve technical failures within the Salesforce configuration handshake.

Product Enablement Specialist II | Jan 2025 – Jan 2026

- Acted as a central point of contact for complex cross-functional workflows (e.g., enterprise URL changes), coordinating with Cloud Services, Data Services, and Product Management to ensure smooth deployments.
- Monitored system health logs and analyzed daily automation reporting for enterprise RPA bots handling Live Site provisioning and Jenkins DNS routing.
- Identified edge cases (missing Salesforce data, API timeouts) and reported them to engineering, preventing client-facing errors and reclaiming 20 minutes of manual labor per client.
- Served as an escalation point for advanced Practice Management setups, handling facility billing, multi-domain environments, and custom integration settings (Keycloak and SSO).

Product Enablement Specialist I | Jan 2023 – Dec 2024

- Coordinated the order-to-activation lifecycle for enterprise clients, ensuring accurate data entry and strict adherence to onboarding SLAs.
- Configured client environments utilizing ModMed's Sysadmin tools, Jenkins, and Jira to support automated onboarding workflows.
- Collaborated directly with engineering teams to rapidly resolve account setup delays and data syncing issues.
- Awarded "Best Team Lead on Implementation" during the first year for dedication to client deployments and teamwork.

EDUCATION

Western Governors University (WGU) | Remote

Master of Science in Data Analytics and Data Engineering | Expected: Summer 2027

Broward College | Fort Lauderdale, FL

Bachelor of Applied Science (BAS) in Data Analytics and Artificial Intelligence | Graduated: Dec 2025
